

SIBTE HUSSAIN

Full-Stack Developer

Lahore, Pakistan • sibte566@gmail.com • +92-300-6346998 • [linkedin.com/in/sibtehussain](https://www.linkedin.com/in/sibtehussain) • sibtehussain.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Developer with 2.5+ years of experience shipping production web and mobile applications end to end, from Node.js/Express APIs and database design through React, Next.js, and React Native frontends. Comfortable owning a feature from schema to UI, including authentication, real-time features, dashboards, performance optimization, and Agile release delivery. Currently working full-time in a remote role.

SKILLS

Frontend & Mobile: React.js, Next.js, TanStack Start, React Native, Expo, TypeScript, JavaScript, Tailwind CSS, Material UI, ShadCN

Backend & APIs: Node.js, Express.js, NestJS, REST APIs, GraphQL, Socket.IO, WebSockets

Databases & Cloud: MongoDB, PostgreSQL, MySQL, Supabase, Firebase, Vercel

State & Data Management: Redux Toolkit, React Query, Context API, client/server state, caching, validation flows

Auth & Integrations: OAuth 2.0, JWT, RBAC, Stripe, NextAuth, UK Companies House API, local LLM tools

Testing & Tools: Jest, React Testing Library, Appium, Docker, Git, GitHub, CI/CD, Agile/Scrum

EXPERIENCE

Full-Stack Developer | Visionixity | Remote

March 2026 – Present

- Build and maintain a full-stack client application using NestJS, TanStack Start, and MongoDB as a full-time remote developer.
- Lead client demo calls and requirements-gathering sessions, translating feature discussions into sprint-ready tasks with the team.
- Take part in system design discussions with the team lead, shaping architecture decisions before development starts on new projects.

Software Engineer / Full-Stack Developer | PlanLab Solutions | Lahore, Pakistan

Oct 2024 – June 2026

- Develop and maintain Node/Nest JS REST APIs alongside Next.js and React Native frontends, covering dashboards, authentication, and form-driven modules end to end.
- Cut unnecessary re-renders and duplicate network calls by restructuring API state handling, adding caching layers, and lazy-loading heavy routes, reducing page load time around 25%.
- Review pull requests and lead architecture discussions with the team to keep the codebase consistent and easy to extend.
- Implement OAuth 2.0, JWT, and role-based access control on client-facing flows, backed by Jest/RTL release checks.
- Maintained Docker-based local environments and CI/CD pipelines, and fixed production regressions within a 4-developer team, cutting release-blocking bugs by 50%.

Associate Software Developer | Agile District | Lahore, Pakistan

Sep 2023 – Oct 2024

- Built responsive React.js and Next.js interfaces with Tailwind CSS and Material UI, shipped directly to production.
- Paired with senior engineers on implementation reviews, production troubleshooting, and architecture improvements across the codebase.
- Traced hard-to-reproduce UI and API bugs to their root cause using browser dev tools, network inspection, and server logs.
- Built REST and GraphQL API integrations with authentication, Redux Toolkit state sync, and structured error handling for real-time data.

PROJECTS

NowVPlay | [Project Link](#) | Next.js, Node.js, Redux Toolkit, OAuth, Material UI

- Built a sports-tech platform with multi-tier client management, dynamic routing, and role-based dashboard layouts.
- Used Redux Toolkit and protected routes to manage live tournament data views and user-specific access flows.
- Improved maintainability by separating dashboard UI, authentication, and data-state logic into independent, testable modules.

VueCent | [App Link](#) | React Native, Supabase, PostgreSQL, Gemini

- Shipped a personal finance app covering budgeting, expense tracking, custom categories, receipt scanning, and reminder alerts.
- Designed the PostgreSQL schema and Supabase integration handling authentication, data storage, and per-user finance records.
- Connected Gemini vision models to extract receipt data from images, cutting manual entry time by 80% for large expenses.

GoodFynd | [Project Link](#) | React Native, Redux Toolkit, React Query, Socket.IO

- Built vendor order management, dashboard screens, and in-app messaging for a food truck platform.
- Integrated Socket.IO for live order updates and real-time communication across active vendor sessions.
- Managed server state with React Query and Redux Toolkit, caching responses to cut repeated network calls by 50%.

Pecunia & Custom Dev Integrations | [Project Link](#) | Next.js, Stripe, NextAuth, Companies House API, PostgreSQL, Prisma

- Delivered onboarding, authentication, payments, and dashboard modules for a SaaS accounting platform serving 500+ active users.
- Integrated Stripe payments, NextAuth, Companies House lookups with input validation and error handling.
- Designed a normalized PostgreSQL schema and backend data layer for invoices, subscriptions, and user accounts, centralizing all business and billing data server-side.

EDUCATION

Bachelor of Science in Computer Science

University of Management and Technology | Lahore, Pakistan | 2018 – 2022
